ART UNIT DESIGNATION

The Group and/or Art Unit designated for this application has changed. Applicant is hereby informed that future correspondence regarding this application should be directed to Group Art Unit 1631.

Restriction/Election Requirement

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-22 and 26-30, drawn to a method and system for conducting a mixture experiment, classified in class 702, subclass 19 and 22.
- II. Claims 23-25 and 31, drawn to a method for defining a reduced set of samples for an experimental space and conducting an experiment on the sample, classified in class 702, subclass 19 and 22.

The inventions are distinct, each from the other because:

Inventions of Groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (M.P.E.P. § 806.04, M.P.E.P. § 808.01). In the instant case the different inventions are directed to methods, system, and computer program product having different functions, different effects, and different modes of operation.

The function(s)/mode of operation of Group I is to determine an experimental space, conduct any experiment. Whereas the function(s)/mode of operation of Group II is to determine an experimental space, specify new factor level ranges, select samples of combinations of factors, and conduct an experiment on the samples. Thus, Groups I and II have different functions, different effects, and different modes of operation; wherein Group I provide for the

Art Unit: 1631

operational steps of specifying new factor level ranges and selecting samples of combinations of factors.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art because of their recognized divergent subject matter and the ^{non patent literature met} search ~~for~~ ^{12/2/03} required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 C.F.R. § 1.143).

EXAMINER INFORMATION

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1.
